

## [University of Pennsylvania]

### **I. Meeting Call to Order 7:33 PM EST**

### **II. Agenda**

- i. Panel Introductions:
- ii. Did any specific experience at Penn influence your chosen profession or your decision to pursue an advanced degree or additional study?
- iii. Did you come to Penn planning to pursue the path you chose? If so, how did you use your resources available at Penn to structure your career path? If not, what influenced your decision and how did you utilize the resources available at Penn?
- iv. What would you say to students who are considering dropping engineering, who don't see the benefits of graduating with an engineering degree?
- v. How did you spend your summers—research/internship? Do I have to have these experiences (which are hard without a high GPA) to get a job when you graduate?

### **III. Adjournment at 8:47 PM EST**
